Posting Date: June 01, 2021
Closing Date: July 01, 2021

The Department of Electrical and Computer Engineering at Queen’s University requests applications from suitable qualified candidates interested in teaching the following undergraduate course in the 2021-22 academic session.

**ELEC 498: Computer Engineering Project**

*Fall Term Course: September 01, 2021 – December 31, 2021*
*Winter Term Course: January 1, 2022 – April 30, 2022*

**Course Description**

Lecture: Yes
Lab: Yes
Tutorial: Yes

The main objectives of the ELEC 490 project courses are either: (a) to propose, design, build, test, and present a project that deals with hardware and/or software and that produces a tangible result; or (b) to propose and study a thesis topic and then prepare a detailed thesis on the application or suitability of a particular device, technique, software artefact, or system to solve a significant, well-defined industrial or research problem. The course features group projects in which both independent work and co-operative effort are required. A supervised working environment is established for the course where progress and long-term goals (i.e., project milestones) are evaluated on a continuing basis by the student groups themselves and also by the faculty supervisors associated with the project groups and the ELEC 490 course instructors.

For the implementation-oriented projects, the emphasis is placed on systems and design methodology, which includes proposal and specification writing, subsystem design, testing, evaluation, and documentation. For a thesis-oriented effort, the emphasis is placed on research methodologies, ability to analyze and compare research results, degree of understanding of underlying theories and experimental methodologies, reporting, and documentation.

Throughout the course, students gain an appreciation of (a) the industrial or research context for the discipline and (b) the demands that might be placed on a junior engineer in the workplace or in postgraduate studies. This course relies on the technical and non-technical skills acquired in any of the courses taken before and concurrently with the project activity. The course is also intended to further develop relevant skills such as project management, documentation, and presentation.

Given the academic weight assigned to the project course, it is expected that each student in a group devote an average of 6 to 8 hours per week across the total of 24 weeks for the Fall and Winter terms.

**Course Learning Outcomes (CLOs)**

- Approach and solve problems in somewhat unfamiliar areas.
- Enhance their knowledge of practical hardware and/or software implementation techniques or increase their familiarity with research methodologies.
- Increase their awareness of the tools and techniques related to prototype testing, evaluation, and documentation.
• Improve their team-oriented work skills.
• Refine their skills in report writing and technical presentations.

Academic Units:
Mathematics 0
Natural Sciences 0
Complementary Studies 21
Engineering Science 0
Engineering Design 63

PREREQUISITE(S): ELEC 326, ELEC 371, ELEC 374, ELEC 377, ELEC 390, CMPE 223 (CISC 223) or CMPE 320 (CISC 320), or permission of the department

Anticipated course enrolment: 240

Qualifications:
Minimum of a M.A.Sc. in Engineering or a related field, or a BASc in Engineering with extensive practical experience in engineering communications. Previous teaching experience at the University level will be preferred. Candidates should have excellent communication and presentation skills. Preference will be given to candidates who are registered as professional engineers in the province of Ontario.

Course Syllabus can be found at: https://www.ece.queensu.ca/undergraduate/courses/elec-498.html

Teaching requirement:
The above advertised course will be taught on campus. Fall term classes begin on September 7th, 2021.

Queen’s University is committed to employment equity and diversity in the workplace, and it invites applications from all qualified individuals. Queen’s is strongly committed to employment equity, diversity, and inclusion in the workplace and encourages applications from Black, racialized/visible minority and Indigenous/Aboriginal people, women, persons with disabilities, and 2SLGBTQ+ persons. All qualified candidates are encouraged to apply; however, Canadians and permanent residents of Canada will be given priority. Academic staff at Queen’s University is governed by a collective agreement between QUFA, QUFA and Queen’s University.

The University will provide support in its recruitment processes to applicants with disabilities, including accommodation that takes into account an applicant’s accessibility needs. If you require accommodation during the interview process, please contact Dijana Krstic, dbk@queensu.ca.

To comply with Federal laws, the University is obliged to gather statistical information about how many applicants for each job vacancy are Canadian citizens/ permanent residents of Canada. Applicants need not identify their country of origin or citizenship; however, all applications must include one of the following statements: I am a Canadian citizen/permanent resident of Canada; OR I am not a Canadian citizen/permanent resident of Canada. Applications that do not include this information will be deemed incomplete.

Applications should include a complete and current curriculum vitae, a statement of teaching experience, the names and contact details of two referees who may be contacted, and any relevant other materials the candidate wishes to submit for consideration. Applications can be submitted to the ECE Appointments Committee at the address below, or by email to Dijana Krstic, dbk@queensu.ca.

Applications should be received no later than July 1st, 2021.

Dijana Krstic, ECE Reception
